INTRODUCTION

The Family Allowance Summary Report is published yearly by the Government of Yukon, Bureau of Statistics. Data presented is derived from Statistics Canada - CANSIM F-55 Postal Code System. Data is geocoded by postal codes of family allowance recipients (those less than 18 years of age) which have subsequently been grouped into community or sub-community areas.

The F-55 program is run by Statistics Canada in June and December of each year on a Yukon set of family allowance recipients. Unless otherwise indicated all data used in this publication is preliminary and derived from December statistics. In some cases entries may not sum to marginal totals because of rounding.

Given the financial incentives of the family allowance program the F-55 data represents a virtual census of the population less than 18 years of age. It should be recognized, however, that administrative procedures do affect the 0 to 6 month category and there exists some underenumeration of children as they enter the labour force.

Given these minor constraints the following data provides accurate information for planning and policy formation in a variety of areas. Detailed tables on children and family sizes are available on request.

1.0 DECEMBER 1985 STATISTICS – HIGHLIGHTS

* The single category Riverdale contains the largest number of children (1,381) the next largest single category is Porter Creek (1,076).

* Whitehorse age distribution and Whitehorse/Rural combined have a higher concentration of children in the year groups 1 to 6. (See 1.3 and 1.5)

* The Rural age distribution exhibits a similar pattern, but overall the distribution is less pronounced. (See 1.4)

2.0 CHILD POPULATION CHANGE 1980 TO 1985 – HIGHLIGHTS

* The number of children in Yukon decreased in 1985 to 6,791 from 7,093 in 1984. (See 2.1)

* The relative proportion of children in the Yukon population has decreased in 1985 (27.50%) from the high in 1984 (30.18%). (See 2.2)

* Figure 2.3 shows that the percent change in child population has dropped noticeably (-2.7) compared to the previous years which show relatively small movement.

3.0 AGE DISTRIBUTION CHANGE 1980 to 1985 – HIGHLIGHTS

* Over the period 1980 to 1985 there has been a relative increase in the number of children 1 to 6 years of age. This is apparent in both Whitehorse and Rural Yukon. (See 3.1, 3.2, 3.3)

* Consequently, there has been a relative decrease in the number of children greater than 6 years of age since 1980. The exceptions are the age groups 7, 12 and 14 in Whitehorse and 13, 14 and 17 in Rural Yukon. Figure 3.4 supports this observation.

Note: The data in this section represents the relative proportion of children in a particular age group as a percentage of Yukon's total child population (i.e. those individuals less than 18 years of age).

4.0 WHITEHORSE/RURAL DISTRIBUTION

CHANGE 1980 to 1985 – HIGHLIGHTS

* In 1985, 61% of Yukon's children lived in Whitehorse compared to 29% in Rural Yukon. This represents a 7% increase for Whitehorse since 1980. (See 4.1)

* Between 1980 and 1985 the most significant change in the distribution of children occurred in Riverdale (a drop from 32.4% to 28.9%). (See 4.2)

* The community of Faro registered a major drop in its share of Rural Yukon children from 21.8% in 1980 to 1.4% in 1985. Consequently, all other communities registered a percentage increase. (See 4.3)
